“ THE SOLID IMPRESSION

“Life is made up of marble and mud. The work of art is already within the block of marble. At Royale Impex, we just make sure the natural beauty of the stone is enhanced further.”

“ ROYALE IMPEX, the courageous & resolute, Down-to-earth.. by excellent service system, builds the solid platform for growth

STRENGTH

Keeping innovations & pursuing growth

AT ROYALE IMPEX,

The story of Royale Impex stretches back over 40 years. Mr KK Agarwal was born in India's natural stone capital, Rajasthan. His family was involved in the natural stone business since 1980s but was focussed on Indian marble. In the wake of liberalisation, in the year 1997, he decided to branch out and bring imported natural stones to India.

The company began with a humble factory set-up in Silvassa and a yard in Mumbai. Today, 25 years later we've developed a 10-acre set-up with state of the art machinery, which includes of entire process line of marble cutting, fibre filling, grinding and polishing. We use vacuum technology resin line, 16 head-polish liner and gang-saw cutting machines. Our block inventory is 2 million sq ft.

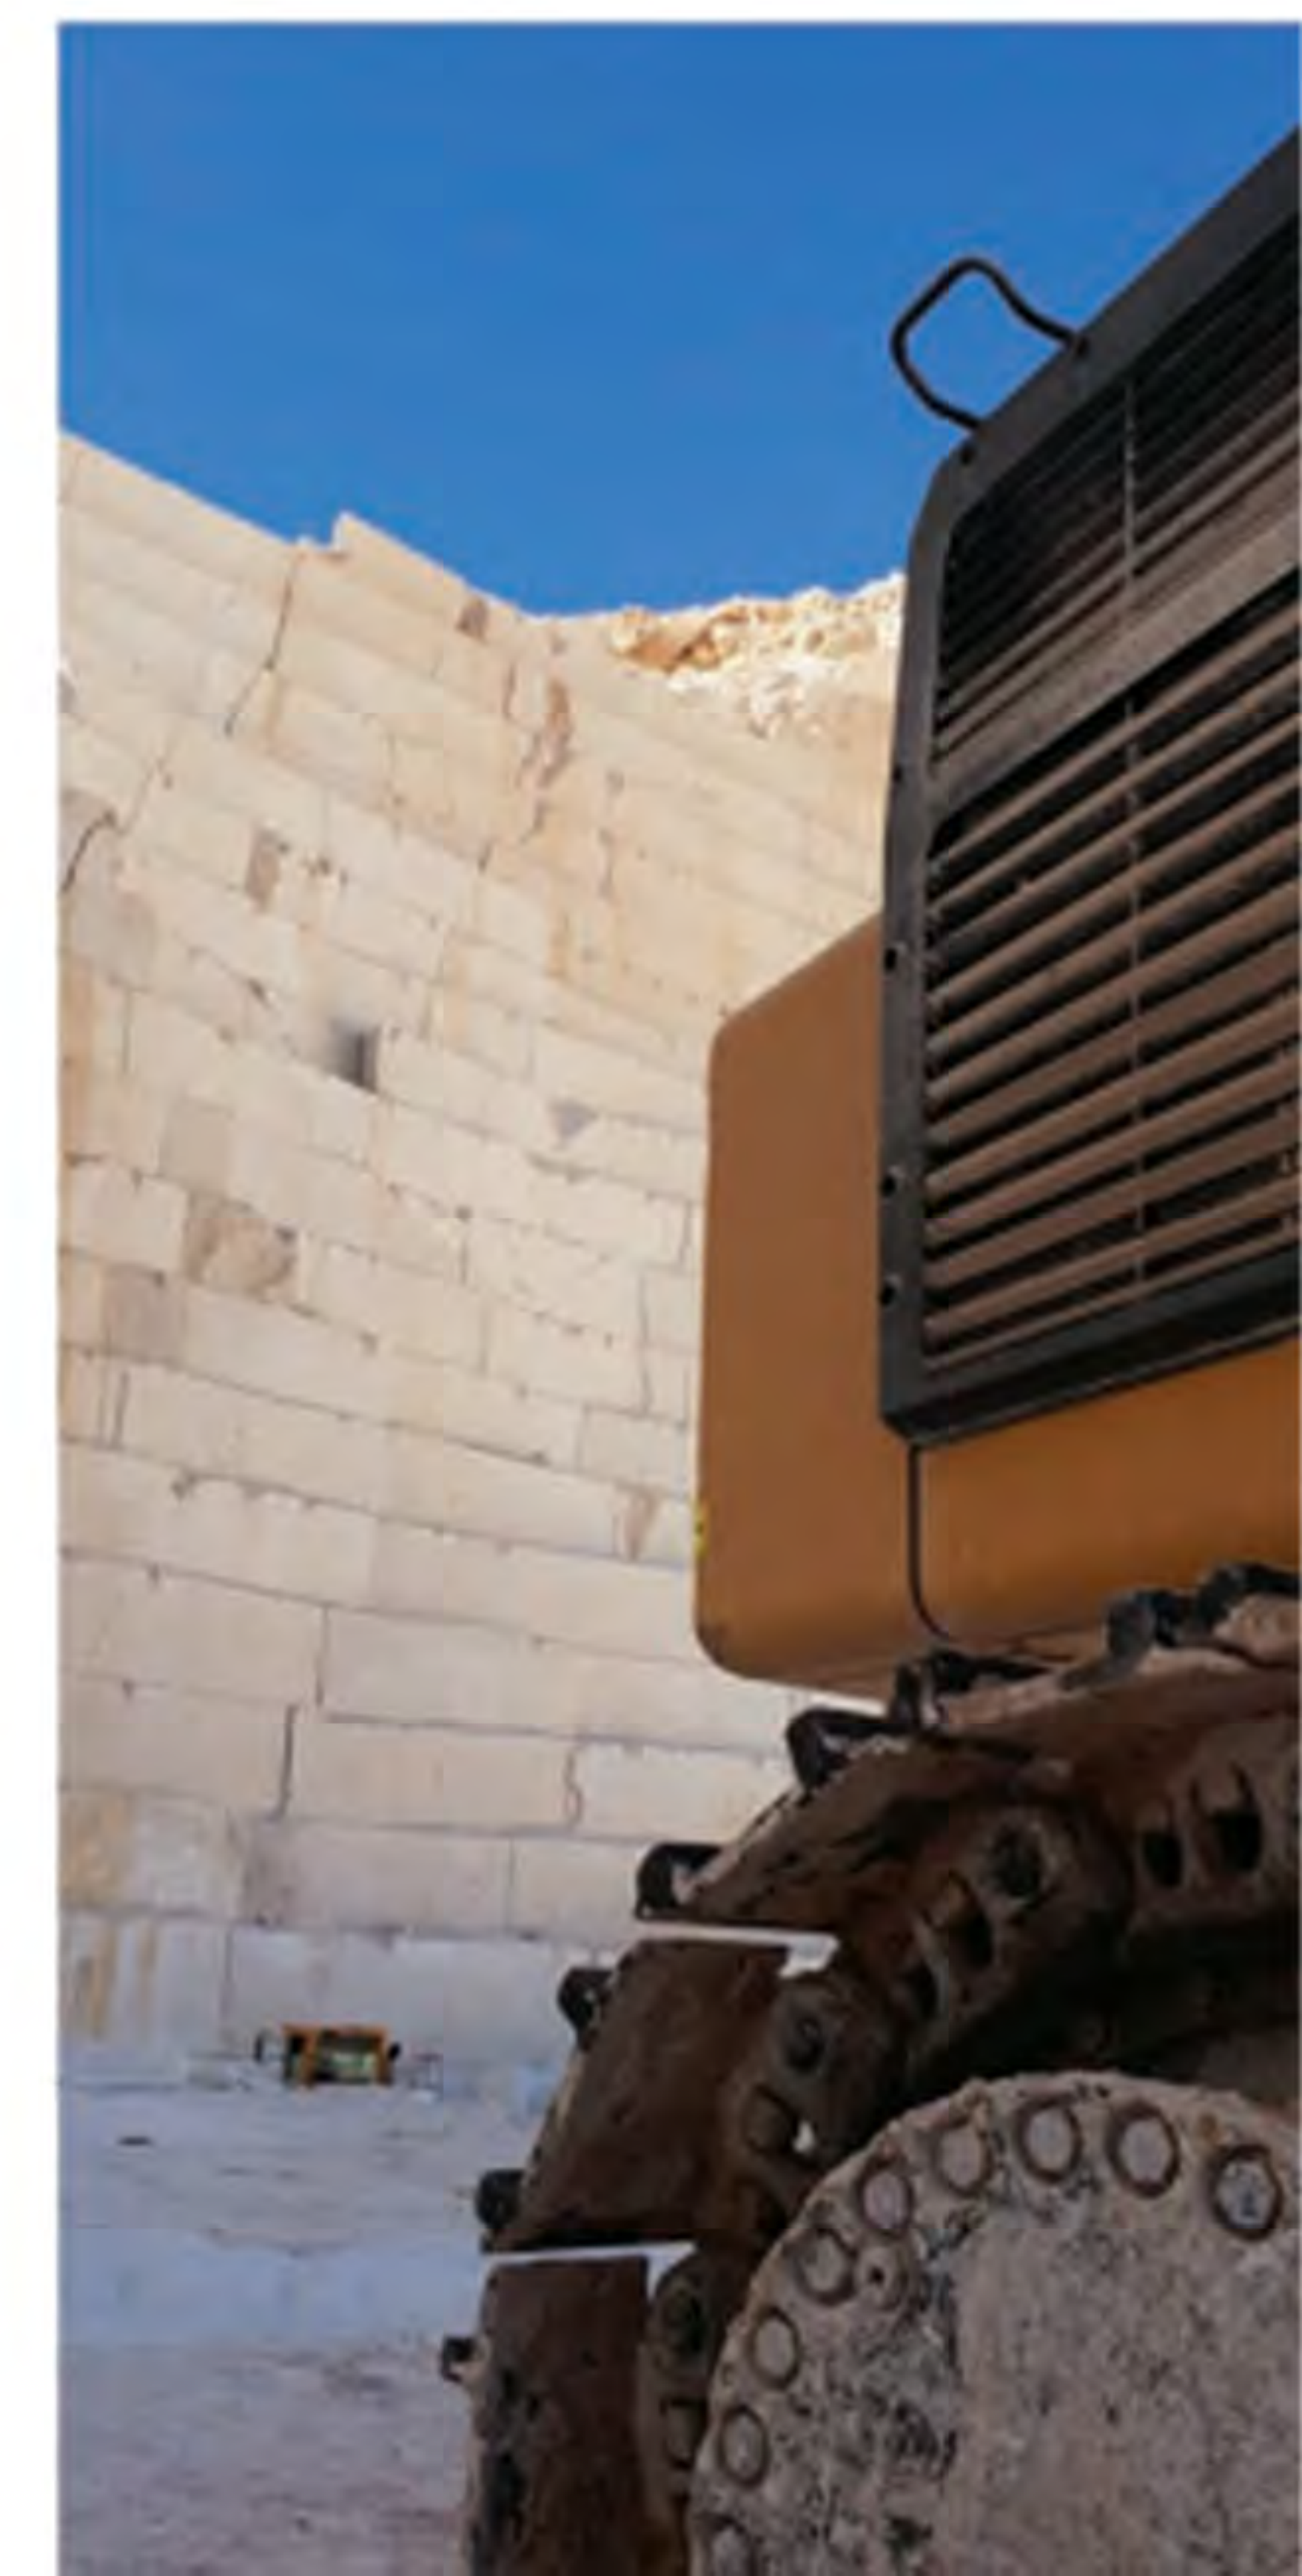

At present, we import natural stones from 30+ countries. Our mission is to provide quality products at affordable prices and our founders handpick each block that is processed at our plant. Our present stock capacity is 1 million sq ft comprising of exotic colors, white, beige, grey, black and semi precious stones. We also customise finishes for our clients.

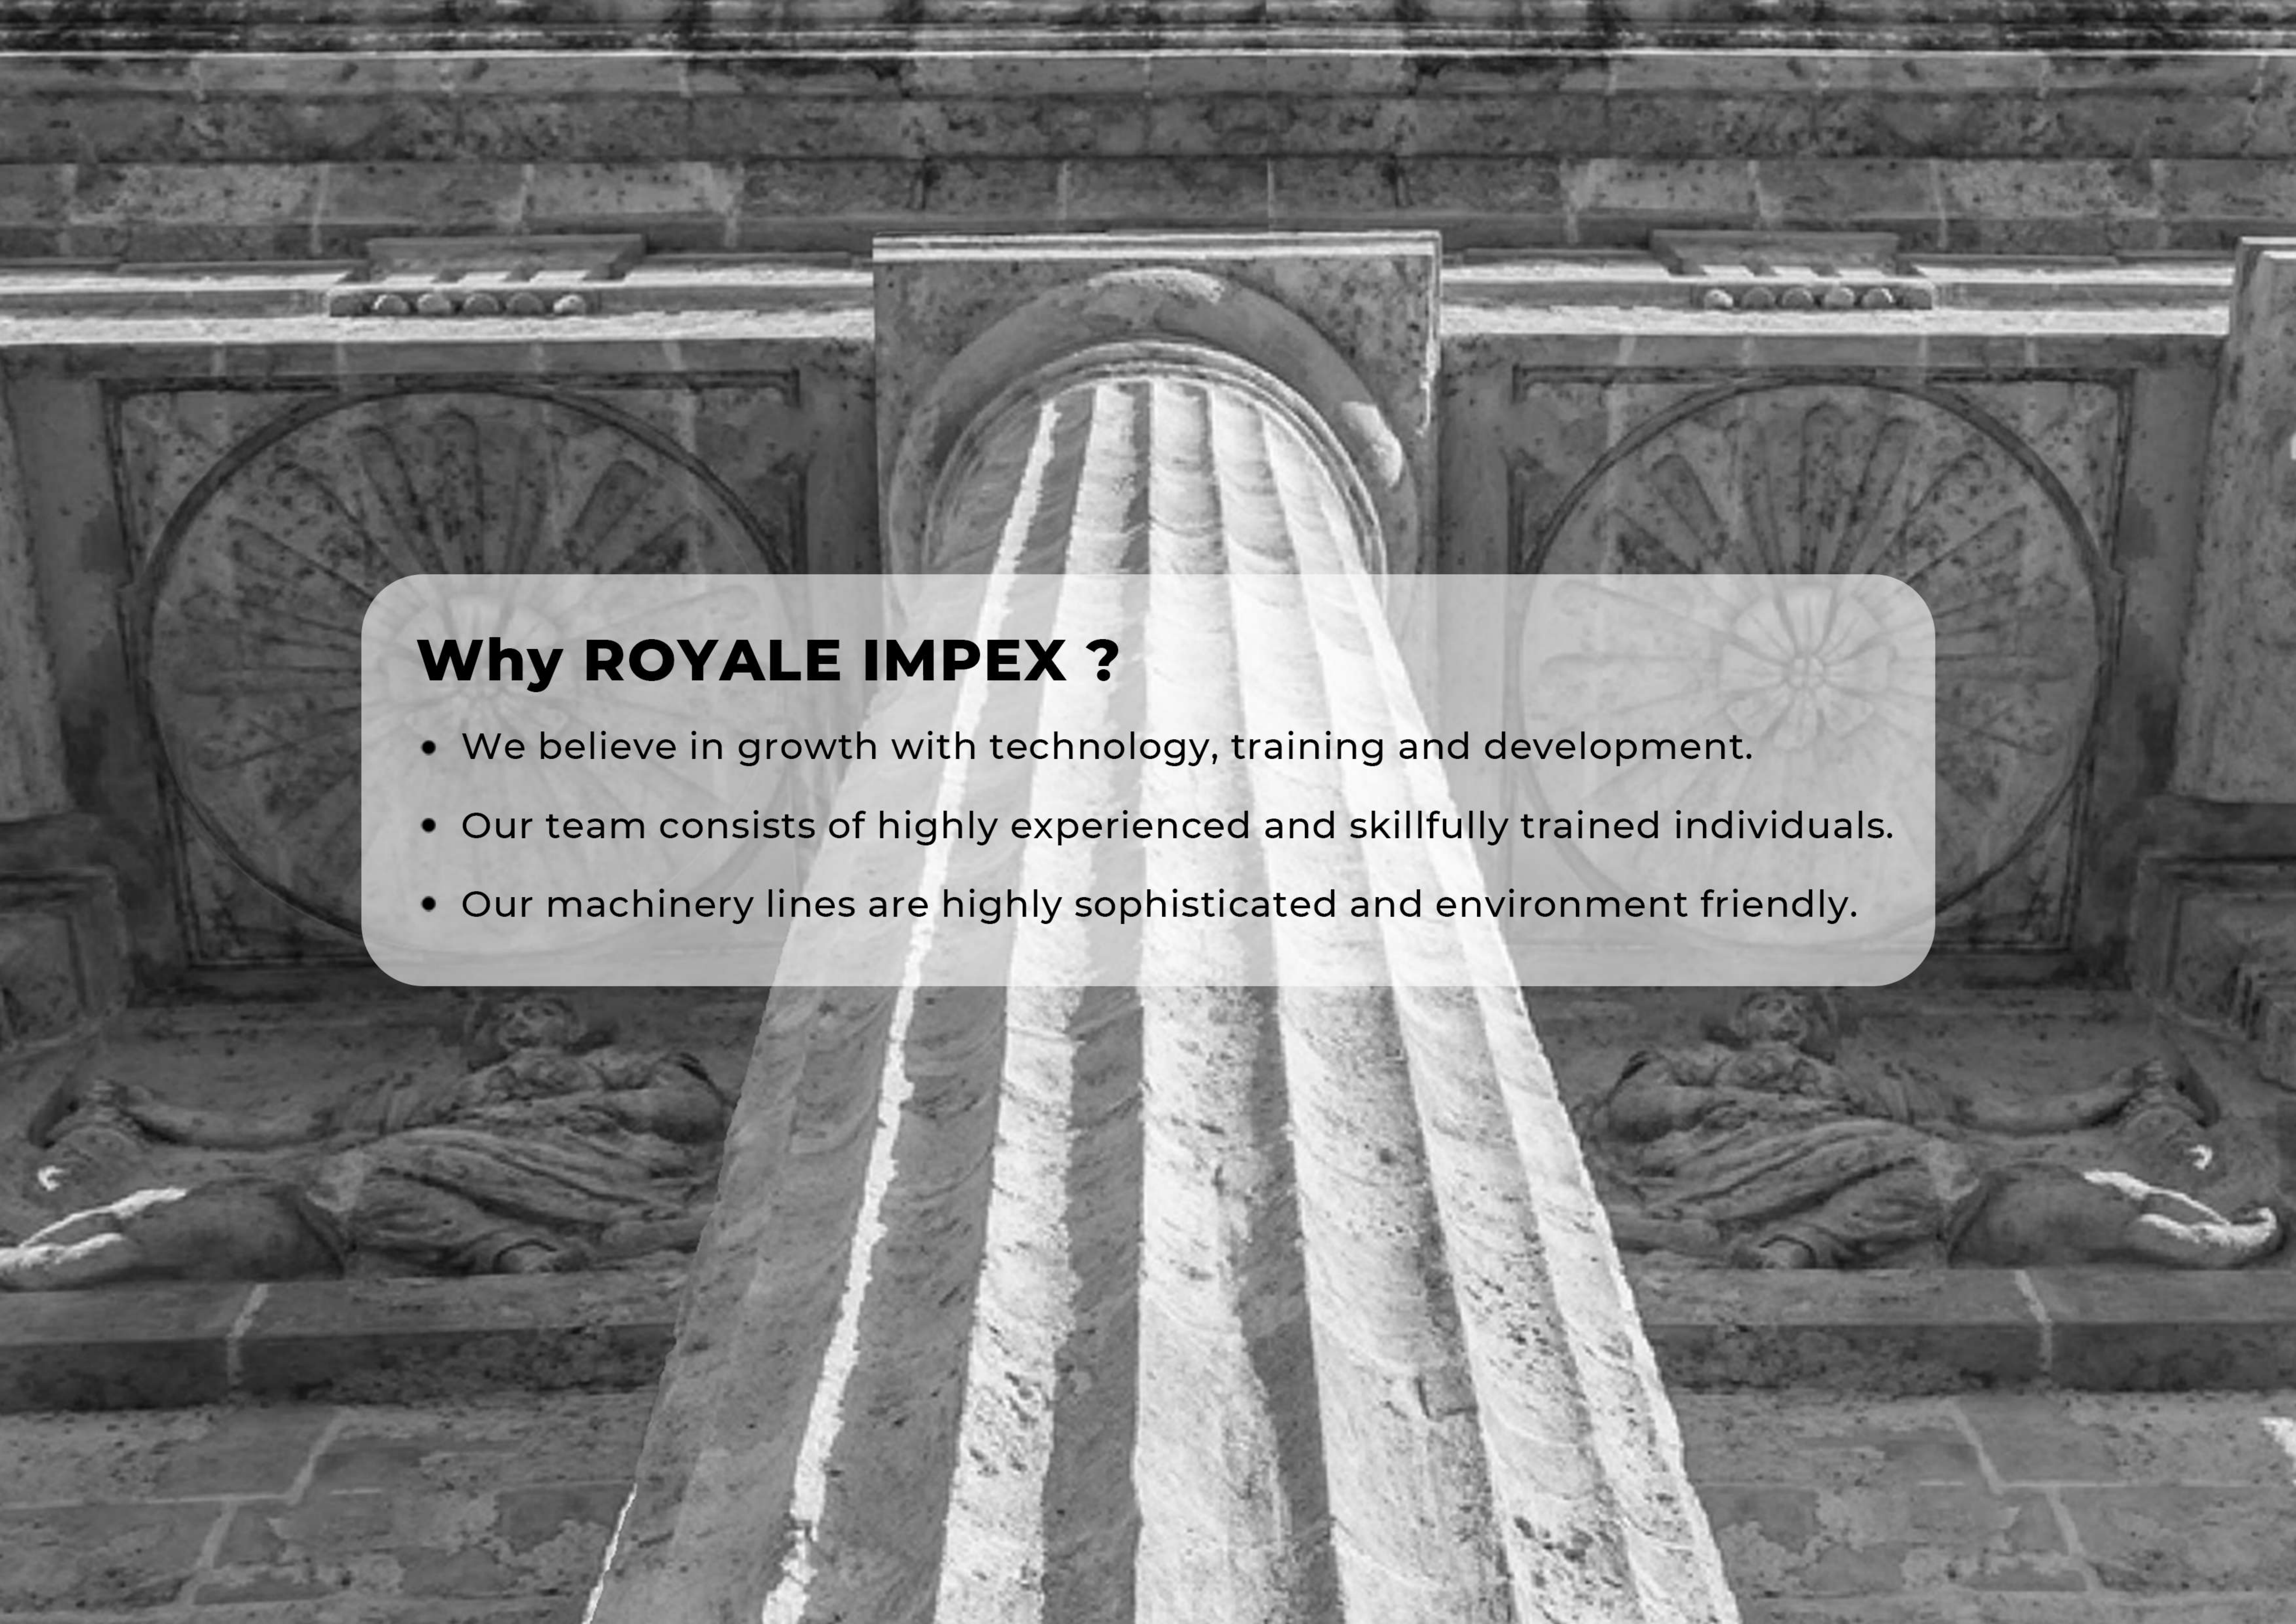

The Royale Treatment - Vacuum Technology

Natural stone gets an added value with the use of vacuum technology. This involves the vacuum treatment for the blocks and the slabs with the best quality resins. Ensuring the epoxy reaches the entire thickness of the slab increasing the flexural strength.

Benefits of Vacuum Technology:

1. The stone becomes perforation free
2. The resin strengthens the stone's composition
3. The beauty of the stone is enhanced
4. Sets the base for optimal polishing and high gloss
5. Helps in protecting fragile stones

Why ROYALE IMPEX ?

- We believe in growth with technology, training and development.
- Our team consists of highly experienced and skillfully trained individuals.
- Our machinery lines are highly sophisticated and environment friendly.

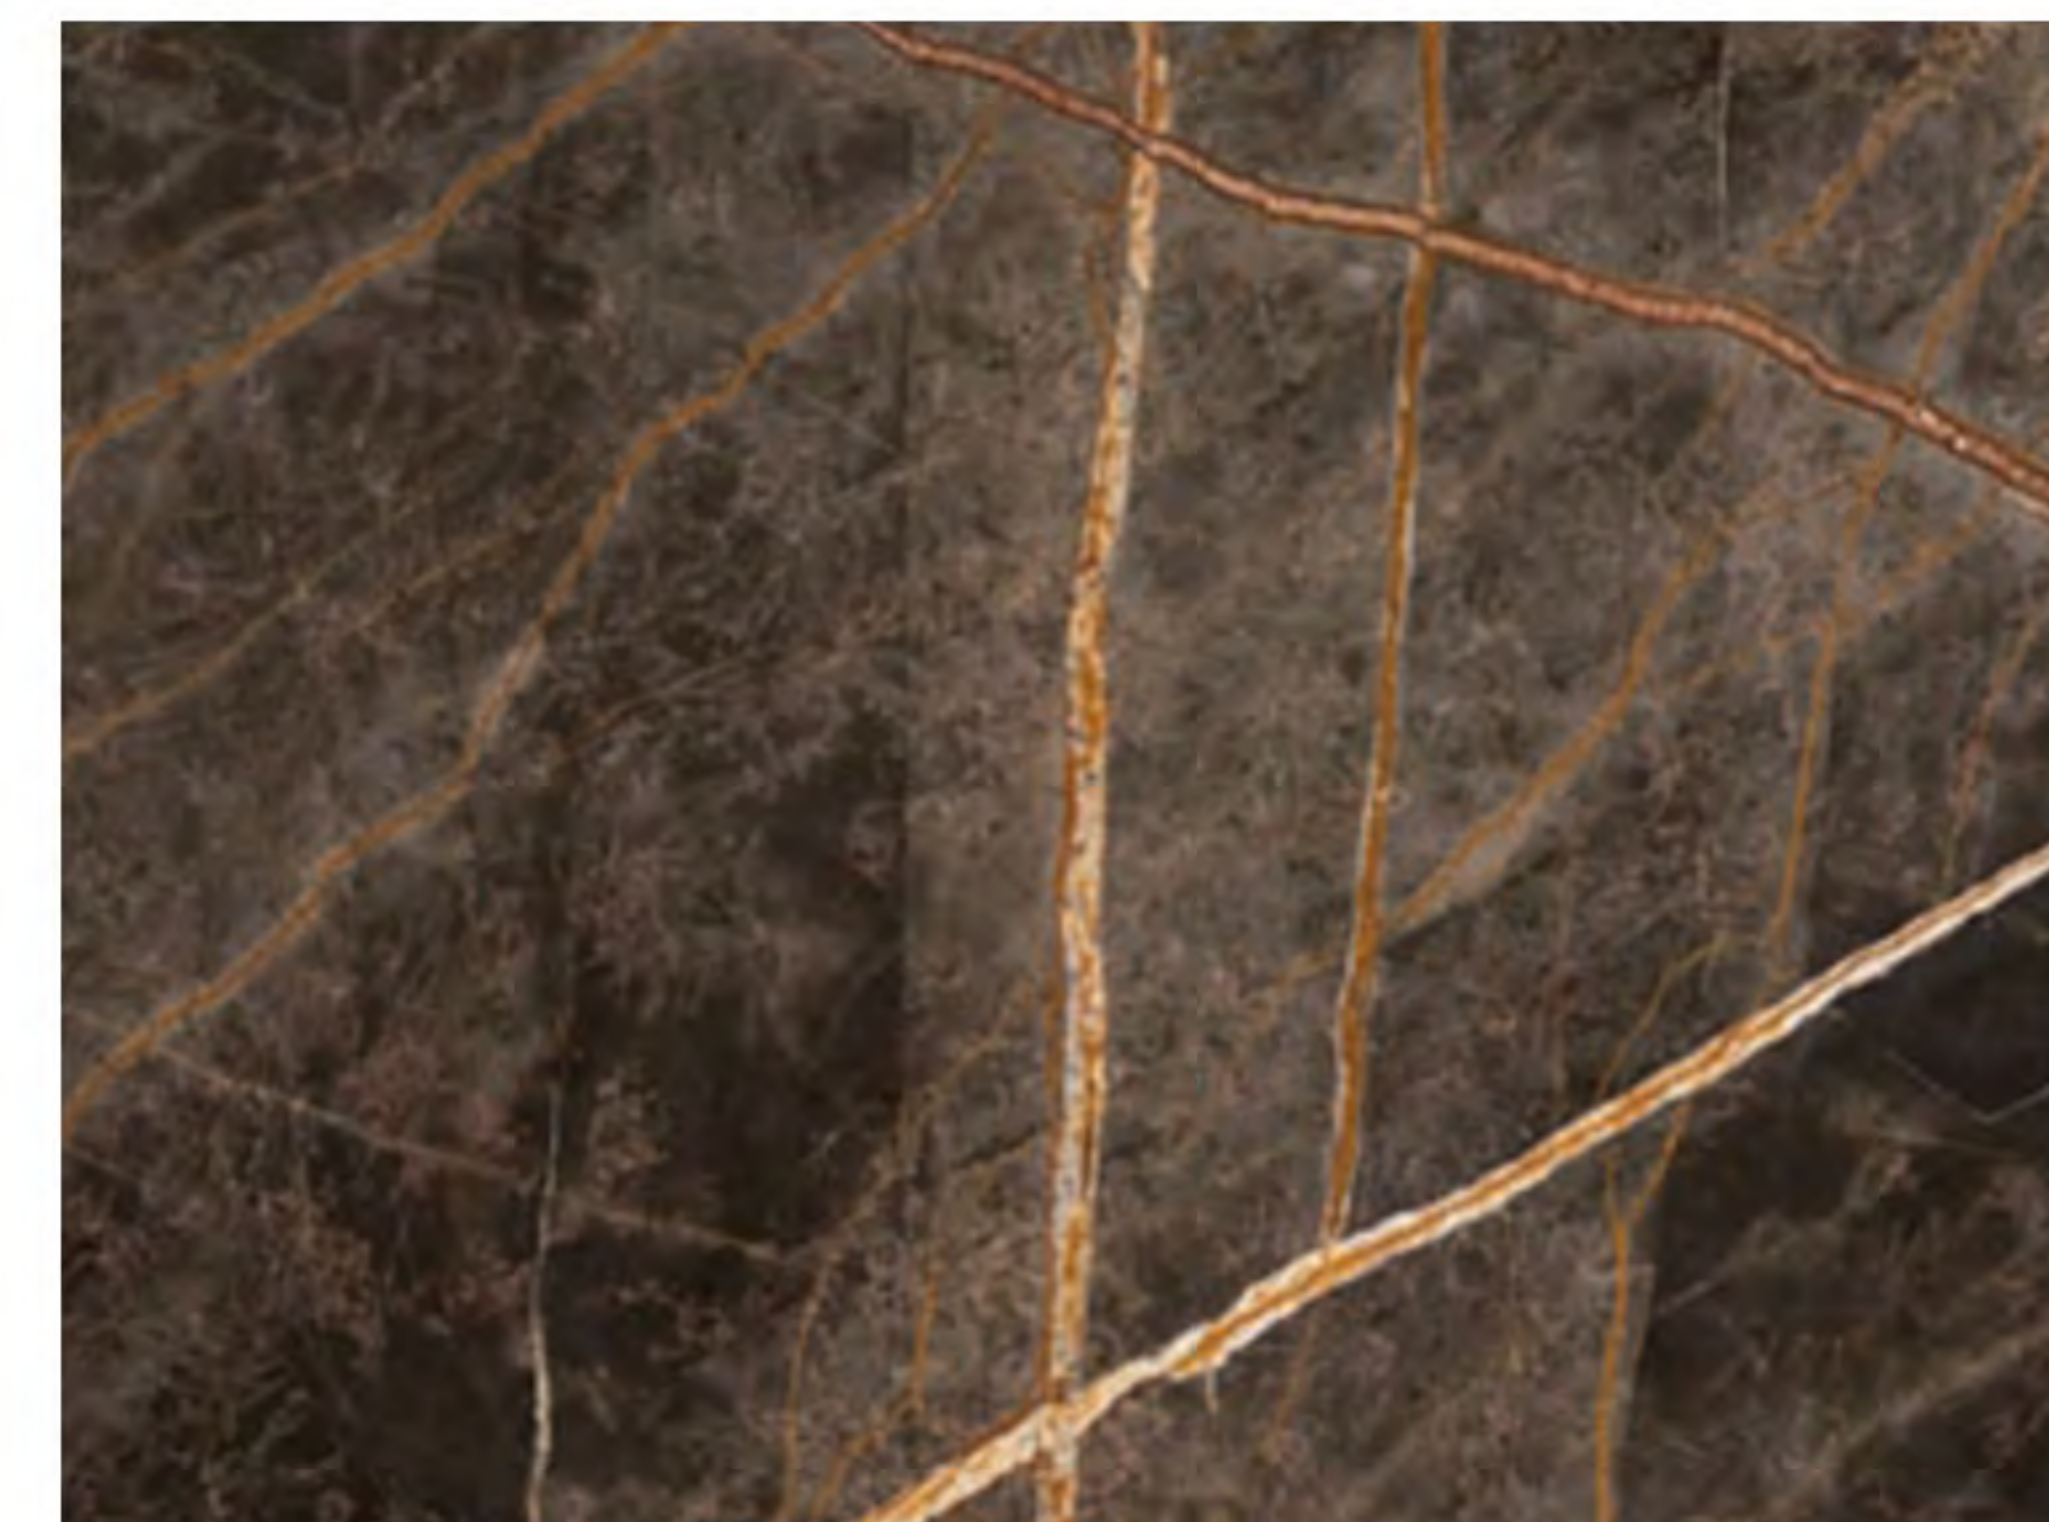

A decorative collage on the left side of the page featuring various natural elements. It includes a large, textured orange stone at the top left, a green leafy plant below it, a blue and white marbled stone in the center, a dark brown stone with white veins on the left, and a light-colored stone at the bottom left. The collage has a torn, layered appearance.
